Jeff is a junior high school student in Happy Town. The following are his experiences of growing plants at school.

March 2, 2022

Our class grew some vegetables in boxes several weeks ago. We didn't put any soil in the boxes. There's only water in them, and we sometimes give the plants special nutrients to help them grow well.

We're happy to watch the plants grow a little day by day. Next week, we're going to make salad with the plants. I really expect to eat the fresh and delicious salad.!

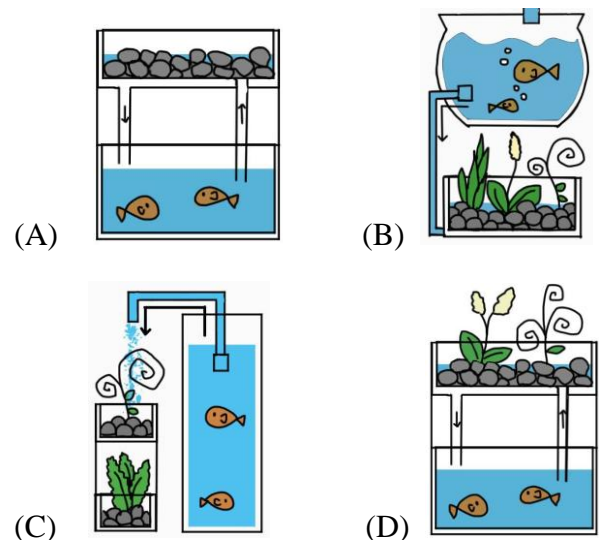

June 24, 2022

we worked together to set up a fishbowl for fish this morning. On the top of the fishbowl, we grew plants on the bed of rocks. It doesn't take much time to take care of the plants because they can get enough nutrients from the fish waste. And the fish can get clean water with the help of the plants. You just need to feed the fish. You don't need to feed the plants, and you don't need to clean the fishbowl, either. The fish and the plants can help each other. How creative it is!

We students can't wait to go to school because of the special design. It's so interesting to have the water garden in our classroom.
