In the past, it was not always easy to travel to anywhere we wanted to go. Today, it is not a problem at all. With VR technology, people can experience the joy of visiting many places without truly going there.

VR is hot in the news. It is used in games, museums, airports, and even hospitals. In the US, many reporters are invited to new VR theme parks to feel what it is like to be in a fantasy world. Some national museums in Taiwan even have VR tours as a way to show knowledge about history to visitors.

Though the VR technology is new, it is easy to use VR headsets. After putting the headset on, we can change the language and volume on the menu. When we move our bodies, the display will match our change of position. The experience is very real. It might even make us cry, smile, or get mad.

We can do so many things with VR. It will be exciting to see what more it can do in the future!
